Company Overview

Seismic - Uniting Crypto and Traditional Finance

Picture a world where crypto and traditional finance seamlessly coexist. That's the world Seismic is creating. We stand at the crossroads of innovation, specializing in banking, merchant services, and transactional tools. Seismic isn't just a company; it's a movement, breaking down barriers to deliver unparalleled financial products globally.

SEISMIC TOKEN FEATURES:

What Sets Seismic Token Apart -

Crypto investors, listen up! Seismic Token isn't your average digital asset – it's a powerhouse with exclusive features:

- **Backed by Seismic Group:** Invest with confidence! Seismic Token is backed by Seismic CB Ltd and Seismic Global (Pty) Ltd, with 20% of the group's shares reserved just for you. Enjoy a growth path independent of crypto market fluctuations.
- **Unique Utilities:** Seismic Token isn't just about trading. Dive into a world of possibilities with unique utilities, including online shopping and Value-Added Services (VAS) distribution. It's not just a token; it's an experience.
- **Revenue Generation:** Ever wanted your investments to work for you? Every transaction on the Seismic platform charges a fee, and guess what? That fee goes right back into the token, ensuring steady growth and a continuous revenue stream designed to make your investment thrive.

Launch on Multiple Chains

Seismic Token on Ethereum and BNB Chains -

We're not playing favourites - Seismic Token is launching on both Ethereum and BNB chains simultaneously. Why? Because we believe in inclusivity. Both chains offer the same mind-blowing functionality, providing you with choices and flexibility. And yes, our smart contract is already deployed on both!

Future Plans

The Seismic Group and Seismic Token, a continually evolving entity, have ambitious plans ahead. We're excited to announce the launch of our AfroPay99 & SeismicPay utilities in Q4 of 2023, followed by the unveiling of our utility NFTs in Q1 of 2024. Brace yourself for Q1 2024 as we redefine the NFT landscape. Seismic Group is set to introduce groundbreaking NFTs that transcend mere digital assets—they serve as your gateway to tangible revenue streams. These NFTs are intricately linked to services such as asset finance, offering you a direct stake in the success of the underlying operations. It's more than an investment; it's an expedition into the future.

Continually follow us on Social Media & Telegram to stay updated on the latest developments.

Security Assurance

Trust in Every Transaction -

Your security is our top priority. The Seismic team is fully doxxed, and our smart contracts have undergone rigorous auditing by the esteemed firm, Cyberscope. Not only that, but KYC conducted by Assure Defi, their process for KYC is far superior to other firms. We believe in transparency, accountability, and, above all, your peace of mind. Invest with confidence!

The Team

Each member of our team is a seasoned expert in their specific field. We're readily available to assist and address any inquiries you may have. The verification of our team has been certified by the reputable KYC assurance agency, Assure Defi.

Assure's diverse multi-national team supports our wide-ranging business functions including verification support, data fulfilment, sales and customer service, brand marketing, compliance, business analytics, legal and law enforcement outreach. Our team is committed to enabling a future where blockchain technology is used to change the world for the better and we enjoy being a part of such an innovative company that is providing a modern approach to security!

Our global team shares deep experience in the blockchain space, a passion for supporting credible builders and a focus on improving WEB3 security.

We have a mix of both public/doxxed and anonymous individuals. We believe anonymity is a core tenet of crypto culture and is an individual choice that should be respected. It's important to note that we require any team member who handles sensitive data to be fully 3rd party verified with background/criminal history checks.

ASSURE DEF[®]I

Crypto Utilities

SeismicPay-

This platform empowers crypto users to instantly and automatically purchase international airtime and data from Seismic across more than 140 countries. Users can access over 14,000 different types of vouchers, ranging from Netflix subscriptions to PetStore coupons, for online utilization. SeismicPay operates through the Seismic Vault, where each transaction triggers a 2% buyback on the Seismic CB Token chart.

RoaringLion-

An integrated online store that allows crypto users to buy items online and receive doorstep deliveries. This store is also supported by the Seismic Vault, where each transaction triggers a 2% buyback on the Seismic CB Token chart.

<https://www.roaringlion.store/>

Staking Pools-

The Seismic Token features multiple staking pools. While the regular staking pool rewards SCB tokens, the ground operations staking pool offers stable coins or ETH as rewards. These staking pools are backed by the Seismic Group's ground operations.

Crypto Trading Desk-

Set to launch in January 2024, our trading desk will enable the average user in South Africa to trade various cryptocurrencies, including blue-chip and selected DeFi tokens, without requiring a centralized exchange (CEX). This addresses the demand in our home country, where many individuals are unfamiliar with CEX environments, let alone DeFi ecosystems.

Utility NFTs-

Present exceptional investment opportunities tailored to different risk preferences. Each NFT is associated with a tangible real-world asset or operation, such as financed assets or pools for payday cash loans. The returns on these NFTs are directly linked to the performance of the associated operation and correspond to the risk level inherent in that specific type of operation. The potential within this realm is virtually limitless.

Ground Operations

Banking-

In the last two years, Seismic Group has strategically evolved into a fintech company, granting it the capability to establish and manage fully operational bank accounts. We will soon unveil a showcase video demonstrating this development. The official launch of our banking services is scheduled to begin in January 2024.

Merchant Services-

Merchant Services: Enabling businesses to accept credit and debit cards, Seismic Group earns a percentage from each transaction made through card swipes.

Assets Finance-

Seismic Group has actively participated in numerous asset finance and leasing deals. In these transactions, Seismic procures assets like Point of Sale devices or card processing terminals on behalf of clients. These assets are retained on Seismic Group's balance sheet and covered by insurance policies until the contract matures. This strategy ensures a stable return with minimal risk on the capital investment. Anticipated to experience substantial expansion over the next 3 to 18 months, this business unit holds promising growth prospects.

AfroPay99-

AfroPay99 is your passport to a borderless digital world. With AfroPay99, you gain access to a powerful platform that enables you to effortlessly purchase international Value-Added Services (VAS), including airtime and data, as well as transport vouchers across an extensive network spanning 63 countries.

Whether you're a globetrotting traveler or simply looking to stay connected with loved ones abroad, AfroPay99 offers unmatched convenience and flexibility.

Say goodbye to the hassles of international transactions and embrace a seamless, secure, and user-friendly solution. Experience the freedom of global connectivity with AfroPay99, redefining the way you manage your mobile and travel needs.

Conclusion

In conclusion, the symbiotic relationship between Seismic Group and the Seismic Token within an innovative ecosystem stands as a testament to the genuine intrinsic value and utility of the token. While meme tokens have captivated significant attention and gained popularity, Seismic Group adopts a distinctive approach, consistently bolstering its presence in both the traditional FIAT financial services sector and the ever-evolving crypto platforms. This concerted strategy is positioned to generate enduring, long-term value for stakeholders.

Among the numerous advantages in the Seismic CB Token ecosystem lies the incorporation of staking pools, offering rewards in both stable coins and the blockchain native tokens, BNB or Ethereum. Advanced plans for utility NFTs and the development of a fully automated online store are also underway. This online store is tailored for crypto users to seamlessly spend their cryptocurrency, with each transaction generating a positive impact on the value of the Seismic CB Token.

The Seismic Token stands apart by transcending the realm of mere speculation or temporary trends. Its value proposition is deeply entrenched in the comprehensive ecosystem cultivated by Seismic Group. This ecosystem doesn't solely hinge on market sentiments or fleeting trends; rather, it is underpinned by tangible and sustainable foundations rooted in the convergence of traditional financial systems and the dynamic crypto landscape.

Through active reinforcement in both traditional and crypto financial spheres, Seismic Group ensures the stability and authenticity of the Seismic Token. The ongoing progression and incorporation of Seismic's services within conventional finance, in tandem with the burgeoning opportunities within the crypto sphere, significantly contribute to the token's enduring value proposition.

This steadfast dedication toward building a robust foundation for the Seismic Token underscores the commitment to delivering substantial and enduring value, aligning with a vision of sustained growth and relevance in both traditional and digital financial landscapes. As a result, the Seismic Token emerges as a reliable and valuable asset, transcending the transient fluctuations inherent in the financial market.
